Passage of Hope, Singapore 2007 presents “The Burned Trees” Exhibition

20 April – 20 June
Passage of Hope 2007 – The Plant for the Planet
Venue: Singapore Management University, Campus Green

Passage of Hope is an annual event which highlights regional environmental issues through the universal language of art. Its goal is to educate and motivate the public to take action in local and global conservation efforts. Organised by the Eco 4 the World Foundation, Passage of Hope 2007 will participate in UNEP’s Billion Tree Campaign by planting 100,000 trees in Singapore.

International artist and sculptor, Philippe Pastor’s “The Burnt Tree Exhibition” consists of 40 burnt trees and aims to sensitize the public to the damages in nature and to address the need to preserve our natural resources.

Community participation, especially in the tree planting exercise, is encouraged. More details are at www.eco4theworld.org or 64230114.
