It’s about taking the first step

CARMEN CHEW, 13

What she is doing: She’s a computer science student at the National University of Singapore (NUS).

Background: Started studying the age of two and doing Primary 1 maths at four. When she was a six-year-old, she was a top student at her primary school, and she began taking university courses in maths at age 11. The scaled NUS as a full-time undergraduate in March 2007.

Extra: This is a child prodigy from NUS late pore ho-

When the thud-year mathematics student graduates But NTU class honours, he would have done it in a mere years. Regular students take four.

Douglas Tan, 12, a shy student who entered NUS in May 2007. His 9-year-old is a Singapore Polytechnic Student.
