Values remain long after school is over.

SMU is well known for its innovative, broad-based and inter-disciplinary curriculum and its interactive pedagogy sought in an inviting campus environment. Students learn to think for themselves - to act with stress in mind. This produces a level of intellectual maturity that prepares them for the "real" world of careers as analysts, offshore oil rig workers, and IT specialists. SMU's School of Social Sciences, School of Law, School of Science and Engineering, School of Business, School of Accountancy, School of Computing, and School of Medicine provide a unique educational experience that educates the "whole" person in a rigorous, new generation of well-rounded graduates, many now arriving for a variety of careers and making meaningful contributions to society and the world. WELCOME TO SMU. DISCOVER A DIFFERENT U.
