SMU School of Accountancy is reshaping the accounting educational landscape. We emphasize SMU's holistic education of broad-based curriculum and interactive pedagogy grounded in ethics and social responsibility, coupled with an innovative career readiness program that drives the brightest students. An overseas accounting study mission coupled with a personally tailored internship programme provide critical insights into career choices. What's more, our professional degree is widely recognized by local and international accreditation bodies and by employers. In fact, the recently released 2011 Graduate Employment Survey reveals that many of our graduates continue to come out tops in securing higher compensation than their peers from other universities. They are employed in wide-ranging high-value-added careers. Their accolades of Professional Excellence welcome to SMU School of Accountancy: Discover a Different U.
