SMU School of Accountancy is reshaping the accounting educational landscape. We embrace SMU's holistic education of broad-based curriculum and interactive pedagogy grounded in ethics and social responsibility with our own "breakthroughs", a robust, up-to-date curriculum, a world-class faculty renowned for their teaching excellence, a rigorous double degree and second major programme that attracts the brightest students. An overseas accounting study mission coupled with a specially designed internship programme provide critical insight into their career choices. What's more, ours is a professional degree widely recognised by local and international accreditation boards and by employers. In fact, the 2009 Graduate Employment Survey* reveals that many of our graduates come out tops in securing a wider range of higher value-added careers and compensation than their peers in other universities. Their secret? Professional Excellence. WELCOME TO SMU SCHOOL OF ACCOUNTANCY, THE WORLD IS YOUR CAMPUS.
